## RYA Formula Future Championships

The RYA hosted its first ever UIM Formula Future junior powerboat racing event over the weekend 14-15 August.

80 competitors aged 8-18 from Great Britain, Malaysia, Czech Republic, Portugal, Germany, Slovakia, and the 2009 Champions Russia, competed in manoeuvring and slalom disciplines.

Representing Great Britain on the Podium was Jordan Muckles from Sunderland, who after an exceptional performance in both the manoeuvring and the slalom was crowned Class 4 World Champion in both events as well as winning Formula Future World Individual in his class.

John Puddifoot, RYA Powerboat Racing Manager said of the competition: "What has stood out is the ability, competitiveness and the children's smiles. Formula Future is a fantastic way of showcasing young power boating talent that we have not only in this country but in the world.

The Ribeye TS350's we used in the competition were the perfect choice. Obviously the safety aspect is number one priority with an event like ours and the handling of these little race boats is superb. We will certainly use Ribeye Tenders again in future international events"

## Introducing the Ribeye S740

An extremely good-looking family boat with sunbathing platform and vast storage capacity. The stylish design does not compromise the superb handling of this boat and the S740 manoeuvres well in rough seas and is ideal for long distance cruising.

## Southampton Boat Show, 10 – 19 September

If you are thinking of buying a new Ribeye or changing your boat for 2011 we'd be delighted to see you at the show. All our new models, including the new S740 and the aluminium Tenders, will be on show on Stand E058 in Windward Avenue and on Yamaha's Stand D015 and available for demonstration from berths M430, M432, M434 and M436.

## Ribeye Aluminium Tenders

The success of the aluminium Tender range has been phenomenal. These light weight models are roomy, strong and robust, ideally suitable for beaching roles, yet light and easy to transport. The smaller models can be transported easily on a roof rack or motorhome roof. All models can be davit hung or stowed on a swim platform.

Because of their light weight they are a real alternative for those who may have chosen an inflatable in the past but would prefer a hard hull.

In June a press day took place at Mandelieu in the south of France hosted by Yamaha Europe and attended by marine journalists and representatives from Yamaha. For 2011 the T series will go pan European with orders taken from dealers in Germany, Italy, France, Greece and Spain.

New, larger TS models will be shown for the first time at Southampton: TS480, TS430 and TS400. These three models have an aluminium hull

- Length: 7.40m
- Beam: 2.55m
- Max persons: 12
- Max power: 250hp
- Design Category: B

and deck but are lighter than similar sized TA models. Most importantly they are extremely competitively priced. For example: TS430, boat only, £2,684 incl VAT. With the Yamaha F30hp and deluxe console, the boat and engine package is £10,580 incl. VAT.

Ribeye is delighted to recommend Land Rover as the ideal towing vehicle for your Ribeye.

## Ribeye Superyacht Tenders

Life is all about going beyond expectation, striving for the highest quality possible to achieve outstanding experiences. At Ribeye, we follow this vision. Our ethos is placed entirely around building the highest-quality RIB yacht tenders, finished to only the finest standards of luxury and ultimate levels of specification. We now offer a range of sophisticated yacht tenders for the private owner. Recently launched is the SYT 560 waterjet which is also available with a variety of inboard or outboard engines and propulsion options.
